

PRITHVI RAJU UPPALAPATI

SPECIALIST MASTER AT DELOITTE

Hyderabad, Telangana, India 500049, India | prithviraju1369@gmail.com | +91 9551658415 | [LinkedIn](#)

PROFILE

I am a Solution Architect with 11+ years of experience building scalable, high-performance consumer-facing applications, combining deep frontend expertise with end-to-end system design.

I design AI-enabled, user-centric systems that power conversational experiences and intelligent workflows, integrating AI into modern web architectures to deliver seamless, data-driven applications.

At Deloitte, I lead full-stack architecture, drive technical vision, mentor teams, and deliver robust, scalable solutions, with a strong focus on applying AI to enhance user experience and accelerate product innovation.

PROFESSIONAL EXPERIENCE

Specialist Master, Deloitte
Hyderabad

2017 to Present

Digital & AI Transformation - Architect (*Jan 2021 – Present*)

Client: Marriott International

Tech: Next.js, React, Nx, AEM SPA, Adobe Target, Temporal, TypeScript

- Defined frontend architecture standards and introduced AI-assisted code generation workflows, accelerating delivery and standardizing implementation across brands
- Designed and implemented a multi-brand design system and style library, ensuring consistent branding and reducing UI rework
- Built an in-house RAG-based AI code generator integrated with design workflows, reducing AEM static component delivery time from **~3–5 days to ~1 day**
- Delivered and scaled high-traffic consumer platforms, including hotel websites, guest connectivity portals, and web check-in experiences
- Led the frontend redesign for The Ritz-Carlton; contributed to winning **Best Mobile Visual Design – Function (Mobile Features), 2024** at the [Webby Awards 2024](#)
- Developed AI-driven conversational interfaces and intelligent search experiences, improving user discovery and task completion
- Led personalization initiatives using Adobe Target and Web SDK, driving improved engagement and conversion through targeted experiences

E-commerce Implementation – Tech Lead (*Mar 2019 – Dec 2020*)

Client: Sleep Country Canada

Tech: Oracle Commerce Cloud (OCC)

- Translated business requirements into scalable technical solutions aligned with product goals
- Led cross-functional teams across engineering, design, and QA to deliver high-quality OCC-based storefronts
- Built custom build and deployment pipelines to streamline releases and integrate version control workflows
- Leveraged OCC extensibility to accelerate time-to-market and improve content and admin usability

Commerce Implementation – Lead Developer (*Jun 2017 – Feb 2019*)

Clients: Tiffany & Co., Scholastic Corporation

Tech: React, Redux, AEM

- Delivered dynamic product curation solutions, enhancing product discovery and user experience
- Developed a drag-and-drop interface for product configuration, ensuring usability and ADA compliance
- Built a lightweight micro-framework using JavaScript observer patterns for dynamic component rendering
- Implemented scalable state management using Redux (Flux architecture)
- Designed reusable higher-order components for efficient data fetching in React applications

Deloitte Practice Initiatives (*Jun 2017 – Present*)

- Won multiple internal hackathons by building innovative engineering solutions
- Developed automation tools improving productivity for developers and QA teams
- Led and contributed to RFPs, building POCs and demos that helped secure new projects
- Conducted trainings, workshops, and seminars to upskill engineers and drive knowledge sharing
- Mentored and coached developers, strengthening team capability and growth
- Led hiring initiatives, conducting interviews and scaling the frontend engineering practice
- Received multiple **Outstanding Performance Awards** for consistent high-impact contributions

Software Engineer , The Digital Group InfoTech Pvt. Ltd
Pune

May 2016 to May 2017

Developed advanced web applications using Node.js, MongoDB and Polymer.js, focusing on maintainability and delivery quality.

- Led development of customer-facing web applications, ensuring timely delivery and adherence to quality standards.
- Mentored new team members and conducted comprehensive code reviews to improve code quality and reduce defects.
- Initiated and ran training sessions that increased code reuse and developer productivity across the team.
- Collaborated with product and QA to streamline development workflows and accelerate delivery.

Programmer Analyst, Cognizant
Chennai

Jul 2014 to Apr 2016

In the role of Programmer Analyst at Cognizant, focused on full-stack development after completing .NET training. Developed internal tools and client deliverables, enhancing project efficiency. Adapted quickly to new technologies through dedicated self-learning, contributing to impactful solutions.

- Developed multiple internal tools, streamlining operations and increasing efficiency by 20%.
- Created client deliverables that reduced project timelines by 15%.
- Adapted to emerging technologies, leading to the successful implementation of new solutions.

EDUCATION

Vellore Institute of Technology (VIT)
Bachelor, Engineering, Chennai

Jan 2010 to Jan 2014
